## Spanish-Language Mobile App Wins Award

Eversource was recognized for its successful launch and implementation of a Spanish-language mobile application. This month, the company received the Electrifying Delivery Award from customer management software provider KUBRA at its annual iConnect conference in Arizona.

Eversource customers in all three states can use the Spanish-language mobile application to view their energy bill, see what is due, make a payment, check the status of an outage, and report an outage. Customers may also customize alerts and communications from the company.

**Electrifying win**
